TOTALLY **HIP** 2017

# Totally Hip 2017

Gothenburg, Sweden · 29 March - 1 April 2017

Global demographics show that people are living longer and lifestyle expectations are changing. Some of the most frequent problems and pathologies in young active patients are injuries of the hip.

An important and fast-growing segment is the active patient with arthritis. Orthopaedic surgeons are seeing patients that want to return to their active lifestyle after injury/joint surgery. Continued advances in diagnosis, material, approaches, technologies, treatment options, surgical techniques and rapid recovery programmes have further enhanced excellent outcomes for these patients.

Conducted by a world-class international faculty of orthopaedic hip surgeons, the Totally Hip 2017 programme will allow surgeons, with a wide variety of clinical experience, in hip preservation and hip arthroplasty surgery, to learn about, and to discuss, all the issues that confront, challenge and excite them in clinical practice from hip preservation through to revision arthroplasty.

All attendees will be actively encouraged to ask questions, interact with faculty, and bring X-rays of their cases for review and debate. The latest modern communication tools will be used in the meeting.

# Totally Hip 2017

Gothenburg, Sweden · 29 March - 1 April 2017

## Course Objectives

Focus on current and modern methods to investigate the hip to achieve a clear diagnosis.

Focus on epidemiology of osteoarthritis, its treatment plus advances in surgical and non-surgical intervention.

- Share and debate best practices to improve standards in hip arthroplasty.
- Focus on the latest developments in THA surgery, state of the art technology and techniques in this rapidly developing area.
- Provide a clear path on how efficiencies and enhanced recovery programmes can help patients, surgeons and hospitals.
- Share and debate the latest clinical proven evidence, PROMS data and how we can measure success.

# Totally Hip 2017

Gothenburg, Sweden · 29 March - 1 April 2017

## WEDNESDAY 29 MARCH

Arrival

## THURSDAY 30 MARCH

### Preservation Hip Sessions

08:30-10:50 **Session I: Osteoarthritis: The problem**

**Session II: The non arthroplasty hip surgery**

### Primary Hip Sessions

11:20-12:20 **Session III: The patient journey**

13:20-15:20 **Session IV: What would make you change?**

**Session V: Patients, options  
& indications - Cases**

*An Interactive Panel Discussion  
session based around case studies*

15:50-18:00 **Session VI: Consistent perfection in THA**

**Session VII: Getting it right / 'Spot on'**

18:00-19:30 **Evening Breakout Sessions - Into detail: Day one**

- *Into Detail Session One: ASI "A New Algorithm for THR"*
- *Into Detail Session Two: Health-Economic Challenges*
- *Into Detail Session Three: Hip Preservation*
- *Into Detail Session Four: Registries*

# Totally Hip 2017

Gothenburg, Sweden · 29 March - 1 April 2017

## FRIDAY 31<sup>st</sup> MARCH

08:00-10:30 **Session VIII: My worst day at the office**

*An Interactive Panel Discussion  
session based around case studies*
