

## PROGRAM

Lecture & hands-on, Language of instruction: English

## LECTURE

- \* From direct to indirect restorations in the smile frame; Application and Indications of VENEERS & OCCLUSIONVDs
- \* Pros & cons of direct, prefabricated and indirect ceramic veneers
- \* History of prefabricated composite veneers
- \* System presentation
- \* Treatment concept and „step by step“
- \* Data research about the edelweiss system

## HANDS-ON

- \* Shade selection
- \* Preparation of tooth and adjustment of edelweiss VENEERS & OCCLUSIONVDs
- \* Surface & internal characterization, specific bonding technique
- \* Size selection edelweiss VENEERS & OCCLUSIONVDs
- \* Finishing of proximal and cervical area

Please bring your own case related study models!

Please bring your magnifying glasses. All necessary tools, models and materials are provided free of charge.

## DIRECT SYSTEM

### VENEER OCCLUSIONVD COMPOSITE

The **DIRECT SYSTEM** from edelweiss dentistry is state of the art for modern and minimally invasive esthetic dentistry.

For the first time in the history of dentistry, it is now possible to work with prefabricated front & occlusal shells made from nano-hybrid composite using modern laser technology.

Thanks to their unique laser-sintering manufacturing process, the translucent enamel and occlusion shells (edelweiss **VENEER & OCCLUSIONVD**) stand out for their inorganic, ceramic-like surface vitrification and tempered composite body. Therefore an optimal integration in function and esthetics is achieved.

## INDICATIONS

Anterior and posterior restorations

Tooth discolorations

Anatomical deformities

Diastema

Attrition

Semidirect and indirect restorations

Lifting of vertical dimension

Crown facings

The occlusions represent the anatomic foundations for single or complete reconstructions and for increasing the vertical dimension **OCCLUSIONVD** (OVD) in the posterior region. Hence, a functioning anterior cuspid guidance can also be obtained using edelweiss **"VENEERS"**.

To ensure an improved, natural color adjustment, the system contains enamel and dentin shades, which are based on the "Natural Layering Technique" by Prof. Dr. Didier Dietschi.

Never before it has been feasible to directly create the natural shape and youthful luminance of a tooth, so easily and perfectly in only one appointment.

**Convince yourself!**

## SHARING EXPERTISE & KNOWLEDGE

MOVE TO THE NEXT LEVEL  
OF ESTHETIC ADHESIVE DENTISTRY  
AND EXPLORE THE EDELWEISS „DIRECT SYSTEM“

Explore advanced knowledge in the field of esthetic treatments, including esthetic diagnostics, treatment planning based on bio-mechanical principles, bleaching, and direct composite techniques with edelweiss VENEERS & OCCLUSIONVDs.

Identify and fulfill unmet patient's needs to boost elective treatments within your office and optimize your practice business by applying mostly conservative techniques and maintaining strict ethical behavior.

Reach a high level of competence in various kinds of direct & indirect adhesive procedures, from the planning to the realization of the treatment during our hands-on sessions.
