

# 1<sup>st</sup> ULTRASOUND Global Summit

## Save the Date!

6–8 April 2017

Hilton Sorrento Palace, Sorrento, Italy

Point-of-care ultrasound is a promising technique for clinical assessment of joints in people with haemophilia, and can be used by non-imaging specialist to detect joint effusion, synovial hypertrophy and abnormalities involving osteochondral surfaces.<sup>1,2</sup>

Led by a Scientific Steering Committee of Experts in the field of point-of-care ultrasound, The **1<sup>st</sup> Ultrasound Global Summit** provides an opportunity for healthcare professionals to learn and share experiences of using ultrasound for haemophilia. The meeting will explore the latest research and scientific advances within the field, advanced scanning techniques, as well as practical implementation of ultrasound within the clinic.

**We hope you can join us for what promises to be a high quality, practical and valuable educational event, aiming to advance the science of point-of-care ultrasound in haemophilia**

- ROUTINE JOINT ASSESSMENT
- INTERACTIVE WORKSHOPS
- CLINICAL IMPLEMENTATION
- ACUTE JOINT ASSESSMENT
- DEVELOPMENT OF CONSENSUS PUBLICATION
- HOT TOPICS

This meeting is initiated and funded by Pfizer
