Advances in Oncology

How to identify and treat the high-risk FL patient?

- Understanding the biology of high-risk follicular lymphoma
- Prognostic and predictive factors in follicular lymphoma
- Understanding novel treatment options in high-risk follicular lymphoma
- Can we predict transformation of follicular lymphoma?

FRIDAY, MAY 12th 2017

Amsterdam, The Netherlands
www.advancesinoncology.nl

Dear colleague,

We are pleased to invite you to the 3rd Advances in Oncology symposium on **How to identify and treat the high-risk FL patient?** taking place on Friday the 12th of May 2017 from 10:00-17:30 in Amsterdam.

The scientific program will provide a comprehensive overview of the latest clinical and research developments in follicular lymphoma. The format of the meeting includes a combination of expert presentations, interactive case discussions, live voting and an opportunity for question-and-answer debates. Highlights of the symposium include the lecture of **Prof. Carla Casulo** from the University of Rochester Medical Center, NY. Other confirmed speakers include **Prof. Martin Dyer** (Leicester, UK), **Prof. Emanuele Zucca** (Bellinzona, CH), **Dr. Vindi Jurinovic** (München) and **Dr. Michiel van den Brand** (Nijmegen).

The day will be chaired by **Dr. Josée Zijlstra** from the VUMC Amsterdam.

Please book the 12th of May in your calendars. You can register already via www.advancesinoncology.nl. More information as well as the final program is soon to follow. We are looking forward to your participation and a meaningful discussion.

Kind regards,
On behalf of the organizing team
