

Instructional Course Oxford Partial Knee

Skills Enhancement - Knee

Keble College
Oxford, United Kingdom
20th - 21st March 2017

 ZIMMER BIOMET
Institute

Instructional Course

Zimmer Biomet commits to being an outstanding provider of continuous education in the field of musculoskeletal healthcare. The Zimmer Biomet Institute will continue setting landmarks in the field of medical education with its training programs as it combines the experiences and focus on the best modalities of the two parent organisations.

With our mission to deliver value to the healthcare providers, hospital and patients, we aim to promote the safe and effective use of our products and services and to help each surgeon to reach the next level, by addressing the needs you encounter in your daily practice. Theory and literature reviews will alternate with clinical and practical considerations, without forgetting the personal experience and exchange with high level faculty in order to provide a complete education experience to the audience. A wide range of modalities will be offered in our training program in order to allow you to find the ideal setting for you personally.

We challenge you and each participant to come to our trainings with an open and curious mind in order to actively participate in discussions and challenge the faculty with your questions, experience and clinical cases.

Learning Objectives

- Review the indications for Oxford Partial Knee Arthroplasty
- Discuss the Biomechanics for Oxford PKA procedures
- Evaluate Prevention & Treatment options
- Perform Oxford PKA procedures safely and effectively during sawbone workshops
- Review the surgical tips from expert faculty that will be beneficial during practice

The Zimmer Biomet Institute wishes you a valuable and enjoyable training with us.

Zimmer Biomet Institute

Our continuum of education offers a vast range of opportunities to health care providers and Zimmer Biomet team members to **learn, interact, understand** and **share** knowledge about our products, services and about surgical philosophies through a variety of modalities.
