

5th Radboud Aesthetic & Reconstructive Round –

AESTHETIC SURGERY OF THE FACE

October 21st, 2017

Radboud University Medical Center, Nijmegen

Dear esteemed colleagues,

We are proud to invite you to join the 5th *Radboud Aesthetic & Reconstructive Round* on October 21st 2017 in Nijmegen with the topic 'Aesthetic surgery of the face'.

The concept of the *Radboud Aesthetic & Reconstructive Rounds* is to get hands-on training on selected topics in plastic surgery from national and international experts. At the same time, an open and frank discussion among the attending colleagues about our own problem cases and failures is strongly encouraged. The content is suitable for residents, but also for experienced plastic surgeons who want to expand and refine their surgical armamentarium.

The most attractive and challenging feature of surgery of the face and especially the eyelid is the complexity of the anatomy and function of this region. The range of tissue types that must be operated on is arguably greater than in any other site of the body. The outcome of rejuvenation of the face has been proven to be satisfying for the patient but not clearly visible for its surroundings. There are many different factors that enter into the decision regarding the optimum operation for a particular patient. Advances in the treatment of head and neck rejuvenation continue to demand modification of the approaches that we take in the management of these patients.

It gives us great pleasure to welcome **Beatriz Berenguer**, MD, PhD, from Spain to our department. She is a renowned expert in the field of aesthetic surgery with a particular focus on periorbital rejuvenation. She worked for 15 years with Dr. Rafael de la Plaza, who described many of the consolidated techniques in blepharoplasty. Dr. Berenguer has developed some more recent modifications and adjuncts. She currently works in Hospital General Universitario Gregorio Marañón and in Clínica la Luz, Madrid, Spain. Furthermore, she is the immediate past president of the European Association of Plastic Surgeons (EURAPS).

I look forward to welcoming you in Nijmegen to join an exciting hands-on training on aesthetic surgery of the face and state-of-the-art lectures!

Kind regards,

Dietmar Ulrich and Hanneke Tielemans

Beatriz Berenguer, MD, PhD

Program

9:00	Welcome: Prof. dr. Dietmar Ulrich
9.05	Cadaver dissection exercises with Beatriz Berenguer and Dietmar Ulrich at the Department of Anatomy, Radboud University Medical Center: <ul style="list-style-type: none">• Anatomy of the face• Different techniques in upper blepharoplasty• Different techniques in lower blepharoplasty• Different techniques in browlift• Different techniques in short scar face lift surgery
