

### **Prof. dr. Eppo Wolvius**

Following graduation at the Dental and Medical School in Utrecht and Amsterdam, Eppo Wolvius started a residency in Oral & Maxillofacial Surgery (OMFS) at the Free University Amsterdam, where he also finished a PhD in 1996. He worked as OMFS in St. Anna Hospital In Geldrop and Maxima Medical Centre Veldhoven. In 2000 he started at the Erasmus MC Rotterdam as consultant and from 2011 onwards he is Chair of the Department of OMFS, Special Dental care and Orthodontics. He is member of the craniofacial team of the Dutch Craniofacial Centre in Sophia's Children Hospital Rotterdam. He is the current chair of the Dutch ITI Section and the present Chair of the International R&D AOCMF Commission and member of the International Board of the AOCMF.

### **Lecture**

#### **Upper Airway at Risk in Craniofacial Anomalies**

- Define groups of patients for upper airway problems seriously at risk
- Show the spectrum of co-morbidities
- Give insight in the management in multidisciplinary perspective
- Show the surgical work-up
- Highlight the long term follow-up and results
