Masterclass Advances in VTE

Dear colleague,

As one of the speakers of this event, I am pleased to announce that the next Masterclass Advances in VTE meeting will take place on **8-9 June 2018 in Madrid, Spain**.

This interactive meeting will provide an opportunity for **in-depth, peer-to-peer scientific discussions** for approximately **250 experts** from across Europe on the latest advances in the management of anticoagulation in patients with VTE.

Developed in collaboration with the meeting Co-chairs, Professor Giancarlo Agnelli and Dr Ander Cohen, the agenda will consider **practical approaches to anticoagulation management and the role of NOACs in redefining the standard of effective anticoagulation therapy in VTE**. During the meeting, you will discuss **key challenges and opportunities in VTE management and use patient case studies** to explore how these may impact clinical practice.

The meeting format has been designed for **your active participation**: from workshops to interactive plenary talks and panel discussions.

This meeting is supported by the Medical Affairs department of the BMS/Pfizer alliance and accreditation is asked for. Please make a note of the date now - **8-9 June 2018** - and communicate your interest to **floor.vangeuns@pfizer.com**.

I hope to see you in Madrid.

Best regards,

Prof. Menno Huisman
