

Population Health Management Course Advanced Panel Management in Healthcare

Monday 11 – Friday 15 June 2018

For the first time we offer a full week “Advanced Panel Management”, which is meant to present a full oversight as well as an in –depth exploration of what is the background and what is needed to develop an effective risk based population approach in healthcare. This week aspects of panel management will be studied and carried out following a change of subject every day, illustrated and demonstrated by various experts in the field. The process of empanelment based on risk assessment following classic epidemiological analysis or based on datamining results, what evidence is available for effective implementation with what kind of risk groups, what kind of preconditions are needed, how can panelmanagement be put into practice and who should be in the lead. This course is designed to help you to incorporate everything that has been learned in the proceeding courses.
