

Treatment Goals in Localised and Metastatic Soft Tissue Sarcoma

September 18th, 2018

Learning Objectives

After completing this activity, participants will

Have a better understanding of:

- *the importance of a multidisciplinary approach of localized and metastatic soft tissue sarcoma in a reference centre for the management of STS*
- *the rationale for the use of anti-PDGFR α antibodies in patients with advanced soft-tissue sarcoma not amenable to surgery*

Have increased knowledge regarding the

- *the current unmet needs in Soft Tissue Sarcoma*
- *key patient selection criteria to optimise therapeutic risk-benefit of available treatment options*

Have a greater competence in

- *selecting treatments appropriate to patients' needs and goals of therapy*

Agenda

Treatment Goals in Localised and Metastatic Soft Tissue Sarcoma

16:45-17:00	Introduction and welcome	Dr. R. Jones, UK
17:00-17:30	Managing localised STS – recent advances and insights	Dr. X. Garcia del Muro, SP
17:30-18:00	Clinical cases – managing patients with localised STS	Prof. L. Lindner, GER
18:00-18:30	Managing metastatic STS – Optimising treatment selection	Dr. V.Karavasilis, UK
18:30-19:00	Clinical case 1 – managing a patient with advanced STS	Dr. I. Desar (NL)
19:00-19:30	Clinical case 2 – managing a patient with advanced STS	Prof. J. De Greve (BE)
19:30-20:00	Clinical case 3 – managing a patient with advanced STS	Dr. H. Dahlstrand (SW)
20:00	Summary and close	Dr. R. Jones, UK
