0930 vascular exposure part III

1000 hands on part III

1300 Lunch

1330 vascular exposure part IV

1400 hands on part IV

1700 evaluation and closing

Participants will work in pairs under direct supervision of one of our experienced vascular surgeons. In 4 parts all the vascular exposures will be first reviewed after which they will be performed at special preserved human bodies.

Aortic anastomosis (both thoracic as well as abdominal) will be made and tested under pressure.
