Workstreams

Clinical Effectiveness and pharmacoeconomics research: evaluating different research methodologies and values for decision-making

Imaging: current and future use of imaging in managing inflammatory arthritis

Optimal Communication: innovative and practical education on interactions between clinicians and patients

Standards of Care in RA: practical guidance on ways to implement guidelines to improve quality of care
Integrated Care in SpA: multidisciplinary approach to improve quality of care

Therapeutic Choice: which treatment is chosen for a particular patient, based on the different modes of action of treatment options for RA and SpA, and the implications these choices can have in the future
