	TITLE	TOPIC	REAL PRES
1	Microwave ablation versus resection for colorectal cancer liver metastases – A propensity score analysis from a population-based nationwide registry	1. Liver: Metastases	Oral presentation
	Significance of Glisson's Capsule Invasion in Patients with Colorectal Liver Metastases Undergoing Resection  Comparison of portal vein embolization (PVE) with PVE and mesenchymal stem cell application effectivity for Future Remnant Liver Volume growth in patients wit	1. Liver: Metastases 1. Liver: Metastases	Oral presentation Oral presentation
4	RAS Mutation Status Alone is Not Sufficient for Predicting Prognosis after Resection of Colorectal Liver Metastases: Deleterious Effects of Double and Triple Mutat	1. Liver: Metastases	Oral presentation
	Initial experience with Irreversible Electroporation of liver tumours  Resection of colorectal liver metastases after initial long-term palliative chemotherapy	1. Liver: Metastases 1. Liver: Metastases	Oral presentation Oral presentation
7	One stage laparoscopic parenchymal sparing liver resection for bilobar colorectal liver metatases: safety, recurrence patterns and oncologic outcomes	1. Liver: Metastases	Oral presentation
	Minimal-Invasive Versus Open Hepatectomy for Colorectal Liver Metastases: Bicentric Analysis of Postoperative Outcomes and Long-Term Survivals Using Propent Not all point mutations are the same: A multi-institutional study of KRAS in Colorectal Liver Metastases	1. Liver: Metastases 1. Liver: Metastases	Oral presentation Oral presentation
10	Parenchymal Sparing versus Anatomical Hepatectomies in Patients with Multifocal (=4 tumors) Colorectal Liver Metastasis: Results of an International Multi-Institu	1. Liver: Metastases	Oral presentation
	Comparison of oncological outcome between ALPPS and TSH in a randomized controlled trial Radioembolisation for neuroendocrine liver metastases: an institutional case series, systematic review and meta-analysis	1. Liver: Metastases 1. Liver: Metastases	Oral presentation Oral presentation
13	Adjuvant hepatic arterial infusion pump chemotherapy after resection of colorectal liver metastases; a phase II trial	1. Liver: Metastases	Oral presentation
	Implementation and outcomes of a national liver surgeons expert panel to determine secondary resectability in patients with initially unresectable colorectal liver Resection versus ablation for colorectal liver metastases in the 21st century: A systematic review of the literature	Liver: Metastases     Liver: Metastases	Oral presentation Oral presentation
16	B cell expression as prognostic biomarker after surgery for colorectal liver metastases	1. Liver: Metastases	Oral presentation Oral presentation
	Survival advantage of laparoscopic versus open resection for colorectal liver metastases: A patient-level meta-analysis of propensity-score-matched studies "Deep" enucleation of pancreatic neoplasms following endoscopic main pancreatic duct stenting: Operative technique and preliminary experience at two high-vol	Liver: Metastases     Pancreas: Surgical Technique	Oral presentation
	Enucleation for branch duct intraductal papillary mucinous neoplasms: a systematic review and meta-analysis.  Network meta-analysis of postoperative outcomes after different pancreatic stump closure techniques following distal pancreatectomy	10. Pancreas: Surgical Technique 10. Pancreas: Surgical Technique	Oral presentation Oral presentation
	Comparative Analysis of Open, Laparoscopic and Robotic Distal Pancreatic Resection: An Analysis of a Single Centre Experience	10. Pancreas: Surgical Technique	Oral presentation
	Minimally Invasive Pancreatic Necrosectomy: A step-up approach towards ultra-low mortality in 103 consecutive procedures  Robotic pancreatoduodenectomy in the Netherlands: a multicenter analysis of the first 100 procedures	10. Pancreas: Surgical Technique 10. Pancreas: Surgical Technique	Oral presentation Oral presentation
24	The lesson learned in 20 years of minimally invasive distal pancreatectomy: techniques and results in 282 consecutive procedures.	10. Pancreas: Surgical Technique	Oral presentation
	Splenic preservation versus splenectomy in laparoscopic distal pancreatectomy: a propensity score matched study  Epidural analgesia in patients undergoing pancreatoduodenectomy: a systematic review and meta-analysis (CRD42018085818)	10. Pancreas: Surgical Technique 11. Pancreas: Miscellaneous	Oral presentation Oral presentation
27	Prevention of postoperative pancreatic fistulas by a newly designed tissue sealant patch	11. Pancreas: Miscellaneous	Oral presentation
	PREHABILITATION MAY AMELIORATE DEPRESSION SYMPTOMS BEFORE MAJOR PANCREATIC SURGERY Patient-controlled analgesia with continuous perioperative lidocaine and s-ketamine is non-inferior to epidural analgesia after robot-assisted pancreaticoduodene	11. Pancreas: Miscellaneous  11. Pancreas: Miscellaneous	Oral presentation Oral presentation
30	Is type 3c diabetes the 'middle child' of diabetes groups? Under appreciated, complicated and ignored.	11. Pancreas: Miscellaneous	Oral presentation
	Machine learning based texture analysis predicts postoperative pancreatic fistula in preoperative non-contrast enhanced Computed Tomography Prognostic value of pre-operative inflammatory markers in resectable biliary tract cancer – validation and comparison of the Glasgow Prognostic Score and Modifi	11. Pancreas: Miscellaneous 12. Biliary: Cholangiocarcinom	Oral presentation Oral presentation
33	The Irish Experience of the Mayo Protocol for Unresectable Hilar Cholangiocarcinoma	12. Biliary: Cholangiocarcinom	Oral presentation
	PERIHILAR CHOLANGIOCARCINOMA WITH AND WITHOUT PORTAL VEIN AND HEPATIC ARTERY RESECTION: COMPARATIVE ANALYSIS OF EARLY AND LATE OUTCOL Long-term survival after radical treatment for perihilar cholangiocarcinoma	12. Biliary: Cholangiocarcinom 12. Biliary: Cholangiocarcinom	Oral presentation Oral presentation
36	Intrahepatic cholangiocarcinoma – Repeated resection of tumor recurrence	12. Biliary: Cholangiocarcinom	Oral presentation
	Intrahepatic cholangiocarcinoma – Influence of resection margins on long-term outcome Eligibility for Liver Transplantation in Patients with Perihilar Cholangiocarcinoma	12. Biliary: Cholangiocarcinom 12. Biliary: Cholangiocarcinom	Oral presentation Oral presentation
39	Hepatectomy for peri-hilar cholangiocarcinoma: is right side the best choice?	12. Biliary: Cholangiocarcinom	Oral presentation
	Unraveling inter-tumoral heterogeneity in peri-hilar cholangiocarcinoma.  Portal vein embolization before liver resection for perihilar cholangiocarcinoma reduces the risk of liver failure and perioperative mortality	12. Biliary: Cholangiocarcinom 12. Biliary: Cholangiocarcinom	Oral presentation Oral presentation
42	Treatment of mid-bile duct cholangiocarcinoma: local resection or pancreatoduodenectomy?	12. Biliary: Cholangiocarcinom	Oral presentation
	Selective concomitant portal vein resection for perihilar cholangiocarcinoma  Expression of integrin a?86 to differentiate perihilar cholangiocarcinoma from benign disease: a pilot study.	12. Biliary: Cholangiocarcinom 12. Biliary: Cholangiocarcinom	Oral presentation Oral presentation
45	Outcomes of re-resection of intra-operative positive bile duct margins in perihilar cholangiocarcinoma	12. Biliary: Cholangiocarcinom	Oral presentation
	Multigene mutational profiling of biliary tract cancer is related with pattern of recurrence in surgical resected patients  Immune cell infiltration in biliary tract cancer	12. Biliary: Cholangiocarcinom 12. Biliary: Cholangiocarcinom	Oral presentation Oral presentation
48	Radical cholecystectomy for Gallbladder cancer: An interim analysis of Surgical outcomes from a tertiary care centre in an endemic zone	13. Biliary: Gallbladder Cancer	Oral presentation
	Re-resection in incidentally discovered gallbladder cancer; the incidence of residual disease and survival.  Trends in incidence, treatment and survival of gallbladder cancer; a nation-wide cohort study	13. Biliary: Gallbladder Cancer 13. Biliary: Gallbladder Cancer	Oral presentation Oral presentation
51	Does jaundice preclude resection in gallbladder cancer?	13. Biliary: Gallbladder Cancer	Oral presentation
	Clinical value of diffusion-weighted MRI for differentiation between benign and malignant gallbladder disease: a systematic review and meta-analysis  Role of PETCT in locally advanced gall bladder cancer	13. Biliary: Gallbladder Cancer 13. Biliary: Gallbladder Cancer	Oral presentation Oral presentation
54	Investigating mutational profile of gallbladder tumours obtained from South African patients.	13. Biliary: Gallbladder Cancer	Oral presentation
	Laparoscopic cholecystectomy in patients with liver cirrhosis: 8 years experience in a tertiary centre and the rule of harmonic device.  Absence of antibiotherapy after cholecystectomy for acute calculous cholecystitis: do we apply the recommendations? Applicability of the ABCAL Study	14. Biliary: Gallstones 14. Biliary: Gallstones	Oral presentation Oral presentation
57	Impact of the implementation of partial enhanced recovery program after cholecystectomy for acute calculous cholecystitis	14. Biliary: Gallstones	Oral presentation
	A multicentre randomized non-inferiority trial comparing usual care to restrictive strategy for use of cholecystectomy in patients with gallstones and abdominal pa Multidisciplinary management of Common Bile Duct Stones: A single centre experience of 844 patients over a five and a half year period	14. Biliary: Gallstones	Oral presentation Oral presentation
	A longitudinal nationwide assessment on practice variation in cholecystectomy PREDICTING THE NEED FOR INTERVENTION IN PATIENTS PRESENTING WITH ASYMPTOMATIC GALLSTONES: CONSTRUCTION AND VALIDATION OF A RISK STRATIF	14. Biliary: Gallstones	Oral presentation Oral presentation
62	Conversion Surgery for initially unresectable biliary malignancies. Multicenter retrospective cohort study	15. Biliary: Surgical Outcomes	Oral presentation
	Negotiating the Curve of Laparoscopic Hepatopancreaticobiliary Procedures (Basic to Advanced) at a Tertiary Teaching Institute The Effects of Anesthesia Methods in Patients Who Underwent ERCP for Choledocholitiasis	15. Biliary: Surgical Outcomes 15. Biliary: Surgical Outcomes	Oral presentation Oral presentation
65	Loss of patency after surgical repair of major laparoscopic cholecystectomy bile duct injuries: contributing factors and long term outcomes	15. Biliary: Surgical Outcomes	Oral presentation
		15. Biliary: Surgical Outcomes 15. Biliary: Surgical Outcomes	Oral presentation Oral presentation
68	Is Long-term Follow-up Important for Patients after Hepaticojejunostomy for Treatment of Post-cholecystectomy Bile Duct Injuries?	15. Biliary: Surgical Outcomes	Oral presentation
	Choledochal malformations in adult patients: results from a national registry in a Western population  Limitations of endoscopic variceal ligation in achieving complete eradication and preventing variceal recurrence	17. Biliary: Miscellaneous 18. General aspects HPB: Endoscopy	Oral presentation Oral presentation
71	Immediate outcomes of robotic resection for hilar cholangiocarcinoma. Initial experience evaluation.	18. General aspects HPB: Endoscopy	Oral presentation
	Laparoscopic intraoperative ultrasonography reduces the need for preoperative MRCP and ERCP in high- and moderate-risk patients with suspected choledocholit Myosteatosis is associated with poor physical fitness in patients undergoing hepatopancreatobiliary surgery	19. General aspects HPB: Imaging 19. General aspects HPB: Imaging	Oral presentation Oral presentation
74	Intrahepatic cholangiocarcinoma as the new field of implementation of laparoscopic liver resection programs. A comparative propensity score based analysis of c	2. Liver: Primary Tumours	Oral presentation
	Reappraisal of the advantages of laparoscopic liver resection for HepatoCellular Carcinoma stratified per BCLC criteria: a propensity score based analysis to assess Accuracy of diagnostic evaluation of hepatocellular carcinoma with LI-RADS	Liver: Primary Tumours     Liver: Primary Tumours	Oral presentation Oral presentation
77	WHICH FACTORS PREDICT LOCAL AND INTRA-HEPATIC DISTANT RECURRENCE OF HEPATOCELLULAR CARCINOMA AFTER SURGERY? A WEST-EUROPE MULTICENT	2. Liver: Primary Tumours	Oral presentation
	Successful inhibition of tumour growth in DEN-induced hepatocarcinogenesis in C57BL/6 mice with HDAC1/2 inhibitor Romidepsin.  Ischemic cholangiopathy following transcatheter arterial chemoembolization for recurrent hepatocellular carcinoma after hepatectomy: An underestimated and d	2. Liver: Primary Tumours 2. Liver: Primary Tumours	Oral presentation Oral presentation
80	Impact of ERAS pathways on the delay between surgery and adjuvant chemotherapy for hepatobiliary and pancreatic malignancies: a single center cohort study	2. Liver: Primary Tumours	Oral presentation
	A paradigm shift in cancer imaging; a study of tumour/normal boundaries in hepatocellular carcinoma using next generation imaging mass spectrometry Preoperative Risk Score for Prediction of Long-Term Outcomes after Hepatectomy for Intrahepatic Cholangiocarcinoma: report of a collaborative, international-ba	Liver: Primary Tumours     Liver: Primary Tumours	Oral presentation Oral presentation
