BATTLEFIELD ADVANCED TRAUMA LIFE SUPPORT

4th EDITION
OCTOBER 2008

Editors

Editor-in-Chief

Colonel T J Hodgetts

QHP MMed MBA FRCP FRCSEd FCEM FIMCRCSEd FIHM FRGS L/RAMC

Defence Professor of Emergency Medicine, College of Emergency Medicine

Honorary Professor of Emergency Medicine & Trauma, University of Birmingham

Editors

Lieutenant Colonel J Clasper

DPhil DM FRCSEd(Ortho) FIMCRCSEd DMCC RAMC(V)

Reader in Surgery, Royal Centre for Defence Medicine

Lieutenant Colonel PF Mahoney

OBE TD MSc FRCA FFARCSI FIMCRCSEd DMCC RAMC

Defense Professor of Emergency Medicine, Royal College of Anaesthetists

Lieutenant Colonel R Russell

MRCP(UK) FCEM DipIMCRCSEd RAMC

Senior Lecturer in Military Emergency Medicine, Royal Centre for Defence Medicine

Contributors to the 4th Edition (2008)

Only contributors who have added material to the 3rd edition are listed:

Colonel T Hodgetts QHP L/RAMC

Colonel W De Mello RAMC(V)

Surgeon Commander S Bland RN

Surgeon Commander S Leigh-Smith

Lieutenant Colonel D Aldington RAMC

Lieutenant Colonel J Clasper RAMC(V)

Lieutenant Colonel J Henning RAMC

Lieutenant Colonel P Mahoney OBE TD RAMC

Lieutenant Colonel C Porter RAMC

Lieutenant Colonel R Russell RAMC

Lieutenant Colonel J Tong RAMC

Major C Dutton QARANC

Major S Everington MBE QARANC(V)

Lieutenant S Brodie QARNNS

Captain B Alexander RAMC

Captain C Gaunt RAMC

Captain P Hall QARANC(V)

Captain D Keene RAMC

WO2 H Jones ARRC QARANC

Flight Sergeant A Carter MBE PMRAFNS

Contributors to the 3rd Edition (2005)

Surgeon Captain P Barker RN
Lieutenant Colonel A Brooks RAMC
Colonel C Cox L/RAMC(V)
Colonel T Hodgetts QHP L/RAMC
Colonel P Roberts CBE MBE L/RAMC(V)
Surgeon Commander P Buxton RN
Surgeon Commander G Evans RN
Surgeon Commander S Tanser RN
Lieutenant Colonel S Ackerman RAMC(V)
Lieutenant Colonel M Byers RAMC
Lieutenant Colonel J Clasper RAMC(V)
Lieutenant Colonel P Davis RAMC
Lieutenant Colonel M Godkin RAMC
Lieutenant Colonel I Greaves RAMC
Lieutenant Colonel A Griffiths RAMC
Lieutenant Colonel S Hunter RAMC
Lieutenant Colonel A Kay RAMC
Lieutenant Colonel P Mahoney RAMC
Lieutenant Colonel P Parker RAMC
Lieutenant Colonel D Parkhouse RAMC
Lieutenant Colonel M Russell RAMC
Lieutenant Colonel R Russell RAMC
Surgeon Lieutenant Commander S Bland RN
Surgeon Lieutenant Commander A Kehoe RN
Major O Bartels RAMC
Major A Brooks RAMC(V)
Major L Greasley QGM RAMC
Major P Hunt RAMC
Major W Jamieson QARANC(V)
Major G Kenward QARANC
Major D Lockey RAMC(V)
Major J McIennan RAMC
Major J Ollerton RAMC
Major C Porter RAMC
Squadron Leader T Griffiths RAF
Captain S Davies QARANC
Captain D Hume RAMC
Staff Sergeant I Moorhouse RAMC
Flight Sergeant A Carter RAF
Pte Bulless RAMC
Walter Henny MD, Department of Surgery, Erasmus Medical Centre, Netherlands

Contributors to the 2nd Edition (2000)

Colonel P Roberts MBE L/RAMC; Lieutenant Colonel TJ Hodgetts RAMC; Lieutenant Colonel J Ryan RAMC(V); Major I Greaves RAMC; Major K Heath RAMC; Major PF Mahoney RAMC

Contributor to the 1st Edition (1997)

Colonel P Roberts MBE L/RAMC

Original Concept

Brigadier I Haywood L/RAMC

Contents

Editors/Contributors	xi
Preface	xiv
Chapter 1 Mechanisms and epidemiology of trauma	
Injury Mechanisms	
Explosive devices	1-1
Blast wave	1-3
Blast wind	1-4
Fragments and bullets	1-5
Burns	1-8
Crush	1-8
Psychological	1-9
Blunt Trauma	
Road traffic collision	1-9
Fall	1-12
Assault	1-12
Epidemiology of Conflict Trauma	
WDMET: Wound Data and Munition Effectiveness	
Team	1-12
Grozny	1-13
Somalia	1-14
US data: Iraq	1-14
UK data: Falklands to Iraq	1-15
Making sense of the data	1-16
Timelines	
Trimodal distribution	1-16
Modal distribution of UK Service deaths	1-19
Damage Control Resuscitation	1-20
Chapter 2 Preparation	
BATLS in context	2-1
BATLS and military readiness	2-2
Actions on Alert	Annex A
CASEVAC Mission Orders	Annex B
9-Liner	Annex C
Chapter 3 Care Under Fire	
Assumptions	3-1
Tactical Issues	3-2
Casualty Actions	3-2

Clinical Issues	
<C>ABCDE	3-3
The role for cervical spine control	3-4
Clinical Actions	
<C> Catastrophic Compressible Haemorrhage	3-5
A - Airway	3-6

Chapter 4 Tactical Field Care

Assumptions	4-1
Supporting Evidence	4-2
Clinical Issues	
Triage	4-3
Tactical Rapid Primary Survey	4-3
Catastrophic Compressible Haemorrhage	4-5
Airway	4-11
Breathing	4-13
Circulation	4-16
Neurological Deficit	4-18
Extremity, Environment, Exposure	4-19
Insertion of simple airway adjuncts	Annex A
Recognition and treatment of shock	Annex B

Chapter 5 Field Resuscitation: Preparation, Assessment and Critical Decisions

Background	5-1
Preparation	
Space	5-2
Equipment and Drugs	5-2
Communications	5-4
The Team	5-4
Assessment and Treatment	
Triage	5-5
Primary Survey	
Catastrophic haemorrhage	5-6
Airway	5-7
Breathing	5-10
Circulation	5-11
Disability	5-17
Exposure, Environment, Extremities	5-17
Secondary Survey	5-20
Packaging for transport	5-22
Surgical airway	Annex A

Chapter 6 Advanced Resuscitation: Emergency Department**Preparation**

Setting the scene	6-1
Background	
Space	6-2
Equipment and drugs	6-3
Communications	6-4
Actions on notification of major trauma	6-5
Trauma team effectiveness	6-9
The team	6-11
Trauma team activation criteria	Annex A
Trauma team roles and positions	Annex B
Universal blood donor	Annex C
Massive Transfusion Protocol	Annex D

Chapter 7: Advanced Resuscitation: Emergency Department**Assessment and Critical Decisions**

Preparation	7-1
Triage	7-3
MIST handover	7-4
Quick Look and Quick History	7-5
Primary Survey and Resuscitation	
Catastrophic haemorrhage	7-8
Airway and cervical spine	7-8
Breathing	7-11
Circulation	7-13
Disability	7-19
Exposure, Environment, Extremities	7-19
Evacuation	7-20
Recombinant Factor VIIa	Annex A

Chapter 8: Chest Injury

Background	8-1
Anatomy of chest injury	8-3
Classification of chest injury	8-4
MIST handover	8-4
Primary Survey – Critical markers of chest trauma	
Chest injury screening test	8-5
Examination of the chest and neck	8-6
Life threatening chest injury	8-8
Potential life threatening chest injury	8-19
Chest X-ray findings	Annex A
Chest drain insertion	Annex B
Analgesia in Blunt Thoracic Trauma (BTT)	Annex C

Emergency thoracotomy

Annex D

Chapter 9: Head Injury

Epidemiology	9-1
Anatomy and Pathophysiology	9-2
Classification of head injury	
Primary injury	9-4
Secondary injury	9-7
MIST handover	9-8
Primary Survey	9-8
Secondary Survey: General features	9-11
Secondary Survey: Specific features	9-11
Investigations	9-13
Definitive care	9-13
Critical care interventions to reduce secondary brain injury	Annex A
Glasgow Coma Scale	Annex B
Fitting (Adult)	Annex C
Grading head injury	Annex D
NICE guidelines for the management of head injury	Annex E

Chapter 10: Spinal Injury

Introduction	10-1
Classification	10-2
Pathophysiology	10-4
Anatomy of stability	10-5
Spinal Cord Syndromes	10-5
Assessment and treatment	10-5
Myotomes	Annex A
Dermatomes	Annex B
C-Spine Immobilisation	Annex C
Log roll	Annex D
C-Spine X-ray	Annex E

Chapter 11: Abdomen & Pelvis Trauma

Epidemiology	11-1
Injury types and classification	11-2
Anatomy and pathophysiology	11-2
MIST handover	11-3
Primary Survey: Critical markers of abdominal trauma	
Abdominal assessment	11-5
Secondary Survey and investigations	11-6
Operative management	11-12
Post-operative care	11-14

Pelvis injury	11-15
Types of pelvis fracture	11-16
Management of pelvis fractures	11-19

Chapter 12: Limb Injuries

Introduction	12-1
Mortality after limb trauma	12-2
Life-threatening limb injuries	
Traumatic amputation	12-3
Major vascular injuries	12-3
Multiple limb fractures	12-3
Open (compound) femoral fracture	12-4
Crush syndrome	12-4
Limb-threatening injuries	
Compartment syndrome	12-5
Assessment and treatment	12-6
Secondary Survey	12-13
Interventions	
Realignment	12-9
Wound care	12-10
Splints	12-10
Definitive care	
Crush injuries	12-12
Traumatic amputation	12-13
Vascular injuries	12-13
Compartment syndrome	12-13

Chapter 13: Burns

Epidemiology	13-2
Pathophysiology	
Inhalation injury	13-4
Cutaneous injury: Burn depth	13-4
Cutaneous injury: Burn size	13-6
Immediate actions and first aid	13-7
Medical care	
Catastrophic haemorrhage	13-8
Airway	13-8
Breathing	13-9
Circulation	13-9
Neurological deficit	13-11
Exposure, Environment, Extremities	13-11
Evacuation priorities	13-11
Other considerations	
Antibiotic prophylaxis	13-12

Escharotomy	13-12
Electrical burns	13-13
Chemical burns	13-13
Phosphorus burns	13-14
Burns in mass casualty scenarios	13-15
Rule of Nines	Annex A
Lund and Browder Chart	Annex B
Burns Calculator	Annex C

Chapter 14: Triage

Introduction	14-1
Triage priorities	14-2
Triage systems	14-3
Triage Sieve	14-4
Triage Sort	14-4
Triage labeling	14-6
Paediatric Triage	14-8
CBRN Triage	14-8
Triage for surgery	14-8
Triage Work Sheet	Annex A
Triage Sieve	Annex B
Triage Sort	Annex C
Paediatric Sieve	Annex D
CBRN Sieve	Annex E
CBRN Sort	Annex F

Chapter 15: Helicopter Evacuation

Introduction	15-1
Advantages and disadvantages of helicopters	15-2
Safety principles	15-4
Importance of Packaging	15-5
Loading	15-6
Care and monitoring during flight	15-7
Handover and in-flight updates	15-7
Specific helicopters	15-8

Chapter 16: Paediatric Trauma

Introduction	16-1
Anatomical differences	16-2
Physiological differences	16-4
Psychological differences	16-6
Safety	16-6

Preparation and equipment	16-6
Triage	16-8
Primary Survey and Resuscitation	16-8
Secondary Survey and definitive treatment	16-14
Psychological impact	16-16
Pain assessment	Annex A

Chapter 17: Environment

Definition	17-1
Prevention and Treatment	17-2
Transfer	17-5

Chapter 18: Forensic and Medico-legal

Confidentiality and protection of patient information	18-1
Consent for examination or treatment	18-2
Medical support to persons detained by UK Forces whilst on Operations	18-3
Religious beliefs guidelines	18-3
Deaths on Operations	18-4
Trauma Governance	18-4

Chapter 19: Intensive Care

Complications of Trauma	
Systemic Inflammatory Response Syndrome	19-1
Recognition of the deteriorating patient	
The Lethal Triad	19-3
Respiratory complications	19-4
Cardiovascular complications	19-4
Gastrointestinal complications	19-4
Compartment syndrome	19-5
Rhabdomyolysis	19-5
Essentials of Ventilation	Annex A

Chapter 20: BATLS in the CBRN Environment

Introduction	20-1
Types of hazard	
Chemical Agents	20-3
Biological Agents	20-5
Radiological hazards	20-7
Nuclear hazards	20-8
Patient treatment and management	20-9
Chemical Primary Survey	Annex A

Chapter 21: Prolonged Field Care

Military nursing challenges	
Clinical space	21-1
Military mission	21-1
Physical environment	21-2
Medical resources available	21-2
Standard of care versus level of care	21-2
HITMAN	21-2

Chapter 22: Trauma in Pregnancy

Management of trauma in Pregnancy	
Primary Survey	22-1
Secondary Survey	22-4

Chapter 23: Treatment of Civilians on Operations

Introduction	23-1
The deployed Military Health System: Basic doctrine	23-3
Do the Military ever expect to treat civilians?	23-3
Obligations to treat civilians	23-4
Civilians v non-combatants	23-4
Reasons the military may not want to treat local civilians	
Mission expansion	23-5
Barriers to NGO/IGO – Military understanding	23-6
Addressing the problems	
International	23-8
National	23-9
Research and guidance	23-9

Chapter 24: Pain & Analgesia

Definition	24-1
Measuring pain	24-1
The Pain Ladder	24-2
Analgesic approaches	24-2
Care Under Fire	24-2
Tactical Field Care	24-3
Field Resuscitation	24-3
Advanced Resuscitation	24-4
Post-operative analgesia	24-4

Chapter 25: Documentation

Introduction	25-1
MIST Tag	25-2

MIST Initial Assessment	25-3
MIST Continued Assessment	25-4
Triage Sort / Secondary Triage	25-5
Priority Panels	25-6
Tracking Slips	25-7
