

Symposium

Support of cancer patients: Inform, choose, monitor and empower!

Practical information

Friday 13th of September 2019 | 10.00 – 16.00 hrs | Universiteit Twente,

This symposium gives an overview of the state of the art of the personalized support for cancer patients.

Care for cancer patients has become increasingly personalized. Treatments are more and more tailored to the tumor characteristics and the patient and his or her preferences. To be able to deliver this personalized care and implement the innovations and new knowledge well it is necessary to know as much as possible about the effects of treatment on both short and long term. These effects are both the wanted and unwanted effects such as late cardiac complaints or fatigue. Moreover, the patient has to be informed about all options and the expected effects to make physicians a deliberate choice together with his or her care givers. Patients get more in control. Moreover, by monitoring patients through e-Health tools and patient-reported outcome measures (PROMs), we gather new data that can contribute in transforming healthcare in Value Based Healthcare: care that is of most value for the individual patient.

The Netherlands Comprehensive Cancer Organisation (IKNL) and the University of Twente are engaged in organizing this second joint symposium to give insight in daily practice of shared decision making in (breast) cancer care and to give an impulse to the support of patients to make choices based on tailored information.

The program starts at 10.00 hours and ends at 13.30 hours. At 13.30 hours a lunch will be served.

Participation is free of charge. Language: English

Location: Vrijhof, de Veldmaat 5 (nr. 47 on the [map of the University Twente, Enschede](#))

PhD defence

Following this symposium Kelly de Ligt, junior researcher at IKNL and PhD student at the University of Twente will defend her thesis "Towards personalized breast cancer care: variation in treatment and follow-up from the patients' perspective" at 14.30 hours.

Location: de Waaier, Hallenweg 21 (zie nr. 12 on the [map of the University Twente, Enschede](#))

Welcome!

The symposium is of interest for:

- care givers in oncology
- researchers
- medical technical researchers
- board members of patient coalitions
- board of directors, managers and staff of care institutions

Please register at:

More information will follow

Programme

- 9.30 uur **Reception with coffee and tea**
- 10:00 uur **Welcome**
Prof. dr. Sabine Siesling, klinisch epidemioloog, IKNL/Universiteit Twente
Prof. Dr. Theo, A.J. Toonen, decaan Faculteit BMS
- 10:05 uur **VBCH an academic point of view**
Prof. dr. Jan.A. Hazelzet, Professor in Healthcare Quality & Outcome, ErasmusMC Rotterdam
- 10:25 uur **VBHC- a daily practice setting**
Pieter de Bey, MSc MBA, directeur Santeon
- 10:45 uur **Profiles registry, physical, social and psychosocial impact of cancer and its treatments**
Prof.dr. Lonneke van der Poll, senior researcher IKNL/Tilburg University
- 11:05 uur **The use of Patient-Reported Outcomes in shared-decision making: What is the Evidence**
Dr. Marc Mureau, plastic surgeon, ErasmusMC
- 11:25 uur **Pay for performance: PROMs**
Speaker follows
- 11:45 uur **Koffiepauze**
- 12:05 uur **Does information heal or hurt? Survivorship care planning for woman with a gynecological cancer..**
Dr. Belle de Rooij, Post-doc researcher IKNL
- 12.25 uur **Technological supported treatment for chronic fatigue in patients with cancer**
Prof. Dr. Miriam Vollenbroek-Hutten, Professor of University of Twente, Head of science and smart up innovation at Ziekenhuis Groep Twente
- 12.45 uur **Design of a an eHealth app to improve implicit vitality in breast cancer patients: a co-creation process**
Roos Wolbers, MSc junior researcher, University of Twente
- 13.05 uur **Shared decision making, patient experiences and preferences**
Ella Visserman, representative, Dutch cancer patients Association Utrecht
- 13.25 uur **Closing remarks**
- 13.30 uur **Lunch and discussion**
