

ESLSD 2019

9th European Symposium on Lysosomal Storage Disorders

A Decade of Innovation in the LSD Care: Where we are Today and What is Awaiting us Tomorrow?

November 14th-16th, 2019,
Marriott Auditorium Hotel & Conference Center
Madrid, Spain

Dear Colleagues,

As members of the Scientific Steering Committee, we are delighted to announce the 9th European Symposium on Lysosomal Storage Disorders (ESLSD). This will be a scientific meeting initiated, organised and funded by Takeda, which will be held from Thursday evening, November 14th to Saturday, November 16th, 2019 in Madrid, Spain.

The ESLSD 2019 will focus on the evolution in the treatment of LSDs including the strengths and limitations of established and emerging strategies for the LSD management; approaches for delivering ERT to target tissues and gene replacement therapy. The symposium aims to summarize orally bioavailable molecules and other novel approaches to treatment of storage diseases and to consider adjunctive therapies that can be added to ERT or SRT to address specific pathologies in storage diseases

As in previous years, the symposium will bring together clinical investigators, scientists and physicians from across Europe and beyond and will offer delegates a sequence of presentations and interactive panel discussions.

With a balance between plenary and parallel sessions, including Meet-the-Expert sessions, the 9th ESLSD symposium should provide an excellent forum for professional networking and promote high-level discussions as well as a pleasant educational experience for everyone taking part.

We greatly look forward to welcoming you to Madrid for what promises to be a fascinating meeting of diverse interest for all!

Best regards from the ESLSD 2019 Scientific Steering Committee Members

Timothy Cox

Director of Research, Professor Emeritus
Department of Medicine
University of Cambridge
Honorary Consultant Metabolic Physician
Addenbrooke's/CUHNHSFT and
Papworth Hospitals
Cambridge, UK

Anthony Futerman

Professor of Biochemistry
Department of Biomolecular Sciences
Weizmann Institute of Science
Rehovot, Israel

Derralynn Hughes

Professor of Experimental Haematology
Clinical Director Haematology,
Oncology and Palliative Care
Royal Free London, NHS Foundation
Trust and University College London
London, UK

Aleš Linhart

Head of IInd Dept of Internal
Cardiovascular Medicine
General University Hospital Prague
Chair Angiology Dept,
Institute of Postgraduate
Education of Physicians
Prague, Czech Republic

Elsa Shapiro

Professor of Pediatrics and Neurology
Division of Clinical Behavioral
Neuroscience
Minneapolis, USA
