

Invitation

Valkhof Lecture

Tuesday November 26, 2019

15.30 - 17.30

Professor Elisabeth Binder has been awarded the Valkhof Chair by the Executive Board of Radboud university medical center.

Professor Binder will deliver this year's Valkhof Lecture, entitled:

Epigenetics of adversity: relevance for psychiatric disorders

You are warmly invited to the official gathering and Valkhof Lecture on Tuesday November 26, 2019

Your faithfully,

Professor Jan Smit
Dean / Vice Chairman of the Executive Board
Radboud university medical center

Prof. dr. dr. Elisabeth Binder was born 1971 in Vienna, Austria. She studied medicine at the University of Vienna and got her PhD in Neuroscience at Emory University, Atlanta, GA, USA. In 2004 she became assistant Professor of the Departments of Psychiatry and Behavioral Sciences and Human Genetics, Emory University School of Medicine and is now adjunct Professor. Since 2007 Elisabeth Binder is Research group leader at the Max-Planck Institute of Psychiatry. As of August 2013 she is Director and Scientific Member at this same institute. Elisabeth Binder received various prestigious awards. She is a board member and secretary of the International Society of Psychiatric Genetics. Since 2014 she is member of the Executive Committee European College of Neuro-psychopharmacology. She is a reviewer for various Scientific Journals, e.g. Science, Nature, JAMA, and the Lancet.

Epigenetics of adversity: relevance for psychiatric disorders

Elisabeth Binder

17.00 Closure

Reception with drinks

The chair is named after the Valkhof (Falcon Court) in the centre of Nijmegen, the oldest city in the Netherlands. The Valkhof is a historic place, which was used as a cemetery in prehistory. The Romans had a fortified settlement on the spot. The Frankish emperor Charlemagne (714-814) held residence at the Valkhof. Also Frederick Barbarossa (1122-1190) was known to use the castle Valkhof. The remains of the castle are still present.
