SHARP (Share the Experience in Assisted Reproduction Program)

Lübeck, Germany

28^t - 29th November 2019

Local host

Prof. Georg Griesinger

I'd like to personally invite you to the university town of Luebeck in the north of Germany at the Baltic Sea to join us for lecture and exchange event. The world of IVF is an exciting area in which to work and study, and we continue to meet and bring inspired people together in forums like this SHARP meeting, to discuss science and ideas and to remain at the cutting edge.

In this 1.5-day program, we will have a lecture block on ovarian stimulation (OS). The lectures in this block will include a group discussion on what is the state-of-art in OS as defined by the brand new ESHRE ovarian stimulation guideline. Beyond that, we will look at the latest science in OS and new treatment protocols integrating biomarkers with treatment.

During a center tour, you will see how we organize our work flow, we will familiarize you with some of the later technologies that we have found useful in clinical practice, and there will be ample time for questions and exchange.

A number of further issues will hopefully catch your interest and will make you depart Luebeck with inspiration for your own work and study. I, therefore, hope to meet you in November, bringing your expertise to our gathering.

Georg Griesinger

LÜBECK SITE SHARP 2019 PROGRAM

Thursday, 28th November 2019
