

World Academy for  
Laser Education in Dentistry

## Certification Course

### Mastership Program Lasers in Dentistry

#### Course Syllabus

The Mastership curriculum Benelux 2020 is based on the original content of the program by RWTH Aachen University. The structure of the module days has been defined on the fact that for the Mastership course Benelux the education has been planned on the weekends, in order to allow dentists to participate in the program, without having too much closing days for their practices.

The program structure selected therefore is as following:

Module 1: 24-26.01.2020 Laser Safety Officer, Laser Physics and Diode Lasers part 1

Module 2: 06-08.03.2020) Diode Lasers part 2 and Erbium Lasers part 1

Module 3: 16-17.05.2020 Erbium Lasers part 2

Module 4: 18-20.09.2020 Combined Wavelengths and Final Exams

Within these modules the curriculum of the Mastership course will be totally covered and all topics will be integrated.
