Welcome to the 13th year of SONOANATOMY: "DISSECT YOUR SONOANATOMICAL KNOWLEDGE"

Each year this course presents novelties in a specific anatomical region and in a specific anatomical structure. This year we have chosen the forearm including elbow, wrist and hand along with muscles and entheses.

Our faculty includes the EULAR Ultrasound faculty and professors of anatomy, radiology, anesthesiology, physical medicine, and orthopedic surgery. They enthusiastically share their knowledge and skill to provide a dynamic and interactive course year after year.

Generously supported by the anatomy staff of the University of Barcelona, Bellvitge campus.

We hope that it will provide an interactive and multidisciplinary course where together we will advance in our knowledge of sonoanatomy.
