Radiotherapy and metastases, palliation or more?

Thursday march 19th 2020

Noordelijke Refereeravond Radiotherapie

University Medical Center Groningen

Noordelijke Refereeravond Radiotherapie

The department of Radiation Oncology is very pleased to invite you to the upcoming research meeting 'Noordelijke Refereeravond Radiotherapie'.

Radiotherapy and metastases, palliation or more?

Summary

- Radiotherapy is an effective treatment for metastatic lesions that cause complaints, with relatively low doses of irradiation.
- Recent developments shed a new light on treatment strategies in metastatic disease, which will be discussed during this meeting.
- Jenske Geerlings will discuss the results of the PEEP study, in which the effect of better patient information on palliation was investigated.
- Joris Ploegmakers will discuss to what extent palliative treatment combined with surgery may improve long term mobility of metastatic patients.
- Jorik Slotman will present a new proposal of an innovative approach using MRI-guided High Intensity Focused Ultrasound (MR-HIFU), for treatment of painful bone metastases.
- Finally Carole Mercier will discuss the added value of ablative radiotherapy in case of oligometastatic disease, which may result in improved (disease-free) survival.

Target group

Radiation oncologists, residents, medical physicists and RTT's.

Program

- Chair: **Judith Dasselaar**, MD, PhD, resident Radiation - Oncology UMCG
- 17.30-18.00 Welcome and registration (sandwiches will be served)
- 18.00 Introduction Judith Dasselaar
- 18.05-18.30 PEEP study: giving pain-education to the patient, it works.
Jenske Geerling, nurse practitioner palliation UMCG
- 18.30-18.55 What operative techniques can offer in Metastatic bone disease
J.J.W. Ploegmakers MD, PhD, Orthopedic Surgeon, UMCG
- 19.00-19.20 *Coffee Break*
- 19.20- 19.45 Treatment of painful bone metastases with MRI-guided High Intensity Focused Ultrasound (MR-HIFU).
Jorik Slotman, student Technische geneeskunde
- 19.45-20.15 Oligometastases and SABR
Carole Mercier, MD, PhD, radiation Oncologist GZA Antwerpen, Belgium
- 20.15 *Closing drinks and snacks*

Radiotherapy and metastases, palliation or more?

Location venue

UMCG, Lokaal 16,
Hanzeplein 1, 9713 GZ Groningen
Please follow the signs 'Noordelijke Refereeravond
Radiotherapie' within the UMCG.

Registration

Please be aware that registration in advance is mandatory.
Registration will be on the 'first come, first serve' basis.
We kindly request you to registrate at:
refereeravond@rt.umcg.nl
