BSSO ERUPTION DISRUPTED – 26 JUNE 2020

Introduction

The BSSO 'Eruption Disrupted' one-day symposium is organized to present an opportunity for both orthodontists and maxillofacial surgeons to gather and share scientific information on diagnosis and treatment planning in this specific field of surgical orthodontics. We have been very lucky to attract eminent speakers, who are considered to be leading experts on the subject. They will share their thoughts and insights, but most of all, their experience in the treatment of eruption and other dento-alveolar problems and disorders. Common problems in the eruption of third molars and canine will be discussed and critically evaluated towards evidence-based decision making, advanced cases with increasing difficulty will be presented and discussed.

The venue of the symposium is the home of BSSO: the Philharmonie in the centre of Haarlem, The Netherlands. It hosts excellent conference facilities, is located in the most picturesque part of Haarlem and conveniently situated in the vicinity of Amsterdam and Schiphol Airport. Staying for the weekend is highly recommended for museums, walking tours through the medieval centre or visiting the Amsterdam or Amsterdam beach (Zandvoort).

We hope to welcome you to BSSO Eruption disrupted on Friday 26 June 2020.

Team BSSO

Program 26 June 2020

- 08.30 *Registration*
- 09.00 *Biology of normal eruption*
Karin Becktor
- 09.45 *Aetiology of maxillary canine impaction*
