CLEARCORRECT + PROGRESSIVE ORTHODONTIC SEMINARS

ClearCorrect appointed the leader in orthodontic continuing education, Progressive Orthodontic Seminars, to become its education partner. Progressive Orthodontic Seminars has trained thousands of dentists around the world to provide quality orthodontic care. For the past 35 years, Progressive has provided comprehensive orthodontic training with a heavily researched and honest curriculum so that doctors can successfully grow their practices within the realities of the clinic. Like all their programs, Aligner+ was made by dentists, for dentists, and has lifetime support to ensure that every dentist can be successful.

Both Progressive and ClearCorrect believe that dentists can provide a high level of aligner care with honest education, quality product, and expert support. Together they have developed an effective program for dentists to be successful in aligners in a realistic practice environment. This program was designed for real doctors with real limitations. ClearCorrect, a Straumann Group brand, is a leading clear aligners manufacturer that has provided best-in-class support and quality products for doctors since 2006. Today, ClearCorrect serves tens of thousands of trusted providers around the world. Wanting to give dentists even more resources,

# Would you like a *safety net* for your aligner cases?

Gain the knowledge and mentors to have confidence in every situation!

There is a great demand to use clear aligners, but the majority of dentists want more support to achieve a high level of care and avoid frustrating situations. Progressive Orthodontic Seminars has worked with ClearCorrect to design Aligner+, a solution for dentists to always be successful in clear aligner therapy. A more extensive diagnosis

system ensures that you choose the right cases that you know you can treat well. Consultants help you prepare treatment plans with great predictability so you know exactly how your treatment will progress. An honest approach means solutions to any problem you may encounter, from lack of patient compliance to using brackets when needed.

## 2-Part Diagnosis System

ensure your proper case selection

## In-Depth Treatment Plans

accurate predictions for smooth treatment

## Expert Consultants

guidance as you gain experience

## Honest Approach

solutions for every problem

### With our predictable Aligner+ system, you'll learn how to successfully

- Maintain and create proper occlusion
- Straighten and move teeth predictably and efficiently
- Close spaces in extraction and non-extraction cases
- Deal with patients who do not wear their trays
- Deliver aligner results to the orthodontic standard of care
- Provide predictable treatment that patients will appreciate

## ARE YOU READY FOR TAKING YOUR ALIGNER TREATMENT TO THE NEXT LEVEL?

### *Gain a strong foundation*

#### TO BE SUCCESSFUL ON ALL OF YOUR ALIGNER CASES

Clear Aligners are a popular and powerful treatment that your patients want. The first step to being successful is growing your knowledge and skills.

Twelve days of education will give you the tools to choose the right cases and appliances to have complete control. Effectively help patients with Class I, Class II, and Class III, of both extraction and non-extraction modalities.

#### Brackets Too?

In addition to understanding clear aligner therapy, you will also gain knowledge of brackets which can help you on the occasion when patients are not compliant or if you need more efficient tooth movement. An honest understanding of aligners and tooth movement will help you be successful on every case.

### SERIES CURRICULUM:

#### Fundamentals for Clear Aligner Success

##### Seminar 1: Foundation for Successful Clear Aligner Cases

Understand the important orthodontic concepts to diagnose your patients and learn how to choose the best cases for you to take on. Acquire a complete diagnosis and treatment planning system with a consultant to guide you on your cases.

##### Seminar 2: Setup Evaluation, Use of Engagers, & Hands-On Workshop

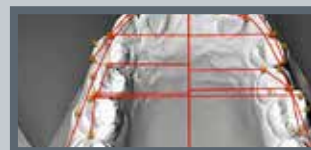

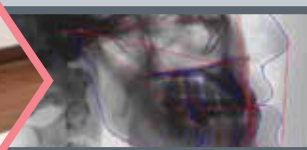

Learn how to treat Class II cases with non-extraction, use engagers efficiently, and communicate with the lab technician for an effective set up. Understand the strengths and weaknesses of aligner therapy and gain confidence in your hands-on workshop to properly use aligners, engagers, and brackets in your practice.

##### Seminar 3: Revisions & Moving Beyond Simple Cases

In this seminar, we will continue to expand the types of cases that you can treat predictably. You will better understand about extraction options and how to treat open bites efficiently. You will also learn how to ensure your cases progress properly and how to make adjustments as necessary.

##### Seminar 4: Solutions to Common Challenges, Retention, & Control on Complex Cases

Understand how to manage any situation and achieve excellent long term retention on all your cases. You will also continue to expand your skills, giving you the tools to be successful with Class III, distalization, and deep bite cases.

### *Full Diagnosis with Mentors is as Easy as 1-2-3*

#### Just screen, submit, and evaluate

With Aligner+, consultants and mentors help you properly set up with complete diagnosis. With support from licensed dentists, every detail is checked and planned in a 10-point system before you start treatment.

The consultant does most of the work, so you can minimize your diagnosis time. While a full diagnosis and plan would normally take orthodontic expertise and over an hour of work up, this saves you two-thirds of that time and gives you excellent results.

### *Benefits of Aligner+*

**HAVE A SOLID PLAN** Use step-by-step plans and instructor guidance to ensure every important detail is analyzed before starting treatment. Following a predictable plan helps you maximize efficiency and profits.

**EXPERTS AT YOUR FINGERTIPS** Consultants and mentors can readily provide you more support with analyzing your patients. They are all rigorously trained and tested instructors who are licensed dentists with strong orthodontic and aligner experience.

**FULL PROTECTION** Be confident and protected on every case you treat. Do aligners right and meet the American Board of Orthodontics standard of care. No shortcuts.

**HANDLE ANY SITUATION** A good understanding of tooth movement paired with access to consultants helps you to treat patients well, whatever happens in the realities of your clinic.
