International Conference on Reproduction, Pregnancy and Rheumatic diseases

WELCOME

Rheumatic diseases are not rare in the general population and they can affect women and men during their fertile age. Therefore, it is necessary to counsel young patients (both males and females) about their desire to have children. When a woman affected by a rheumatic disease wants a baby, it is necessary to assess and discuss the possible influence of pregnancy on her disease and the impact of her disease on the pregnancy outcome. In addition, information about the use of drugs in male and female patients wishing to conceive and during pregnancy is crucial for an adequate management. However, this information is usually scarce and not derived from clinical trials.

Other issues related to the reproductive journey have emerged as "unmet needs" for rheumatic patients. For instance, there is need for more discussion about contraceptive methods, medically assisted reproduction techniques, breastfeeding, long-term outcome of children, parenting with a chronic disease.

The International Conference will gather not only expert physicians and researchers but also midwives, nurses and other health professionals from all over the world to discuss and share their data, their experience and to draft future collaborative studies. Although the increasing research efforts in the field, the highest level of evidence-based medicine cannot be applied in every area of the reproductive field. Therefore, it becomes crucial to foster a scientific community who is in charge of developing recommendations for patients' management based on both published evidence and expert opinion.

ABSTRACT

The presenting author of each accepted abstract has to be registered and follow the virtual Congress. The titles and the authors of the accepted abstracts are listed on the final programme and the complete text of each abstract is published on the abstract book (online version). The abstract book is uploaded in the Congress platform, in the Virtual Bag section.

ORAL PRESENTATIONS

Oral presentations are limited to 7 minutes followed by 3 minutes of discussion. Participants presenting in oral sessions have pre-recorded their presentation. During the discussion the presenting author will be able to answer live to all the questions received by the chairs.

E-POSTERS

All accepted posters are available on a specific section of the Congress platform and every participant can:

- Search a poster using few keywords, such as topic, authors, title, code
- Zoom in/out to see the details
- Send messages or questions to the authors searching them in the Chat area of the platform.

ON-DEMAND

All the live sessions will be available on-demand until November 28, 2021. It will be possible to watch the missed sessions, or the parallel rooms, 24 hours after the end of the live.

MEET THE PROFESSOR

The Meet the Professors will take place in a zoom virtual room on Friday August 27 between 07:30-08:15 and will focus on one of the following topics:

- Antiphospholipid antibody syndrome
- Treatment of chronic arthritis
- Systemic lupus erythematosus
- Safety of antirheumatic drugs
- Counseling about reproduction issue in Rheumatology

Those who have registered for one of the Meet the Professor are asked to be connected to the virtual room 15 minutes before the beginning of the meeting in order to be splitted in 5 different breakouts and follow the correct topic. During the meeting all the connected delegates can turn on their camera and microphone in order to have a better interaction and discuss with the key opinion leader.

Please contact the Organizing Secretariat if you have lost the zoom link.

CURBSIDE CONSULTATIONS

These sessions encourage a spontaneous discussion of a difficult clinical case. The case is presented by a speaker who raises a few key questions. Three experts give their opinion on the best diagnosis/treatment options and discuss the case among themselves as physicians often do in their daily practice (without any slides). The case is not previously known by any of the discussants. The speaker's role is to ensure a lively conversation and cover the various approaches, as well as to involve the audience in the conversation.

THE GREAT DEBATE SESSIONS

The purpose of the debates is to have an intense discussion on some of the most burning controversies related to a specific topic. The two sides of each debate will be defended by two leading experts in the field, and the discussion will be controlled by a moderator whose role is to ensure that all aspects of the debate are duly discussed, as well as to involve the audience in the conversation.

SIR GRANTS

The Italian Society of Rheumatology (SIR) will provide 15 grants to participants selected for oral or poster presentations which have reached a high score and found to be particularly meritorious by the Referees. Only the presenter of a selected abstract will be eligible for the grant and he/she should be a SIR member, younger than 40 years old and in good standing with the membership fees (2021 included).

The grant of € 1000,00 gross will be recognized directly by SIR to the authors of selected abstracts after the Congress. The winners are bound to join the conference and pay the registration fee.

UEMS/EACCME Accreditation

The 11th International Conference on Reproduction, Pregnancy and Rheumatic diseases, Firenze, Italy, 26/08/2021-28/08/2021 has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME®) with 13 European CME credits (ECMEC®s). Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

Through an agreement between the Union Européenne des Médecins Spécialistes and the American Medical Association, physicians may convert EACCME® credits to an equivalent number of AMA PRA Category 1 Credits™. Information on the process to convert EACCME® credit to AMA credit can be found at www.ama-assn.org/education/earn-credit-participation-international-activities.

Live educational activities, occurring outside of Canada, recognised by the UEMS-EACCME® for ECMEC®s are deemed to be Accredited Group Learning Activities (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada.

The online platform will track attendance of delegates each day during the Congress. Each participant could only receive the number of credits he/she is entitled to, according to his/her actual participation at the event, and only once he/she has completed the evaluation form. The process and detailed information will be sent by the Organizing Secretariat after the Congress.
