

# Digital Workflow and aesthetic solutions for CAD/CAM restorations

with **Simone Moretto & Adriano Teixeira**

During this one-and-half day workshop we will discuss the complete chairside digital workflow, from preparation designs to materials selection, characterization and luting.

As supragingival margins are better detected on the digital workflow, we will present some guidelines on deep margin elevation in order to facilitate the marginal preparation and the luting procedure afterwards.

We will discuss different CAD/CAM blocks, their indications for each clinical situation, as well as their finalization and characterization: how to achieve aesthetic indirect restorations with a simple polishing or painting technique.

This course is designed for dentists that want to step in the digital chairside workflow.

After this course you will have a general understanding of digital workflow and its related procedures like deep margin elevation, onlay preparation, material selection and luting in the digital or conventional workflow.

## DAY 01

- 12:00** Welcome to the GC Europe Campus and Lunch
- 13:00** Presentation  
Overview on the digital workflow with focus on modern design for onlay preparations and deep margin elevation
- 14:30** Coffee break
- 15:00** Demo & Hands-on  
Deep Margin Elevation
- Concepts and practice for preparation and temporization
- 17:00** End of the first day
- 19:00** Dinner at restaurant

Deep margins

Elevated margins

Tabletop preparations

Temporary restoration

## DAY 02

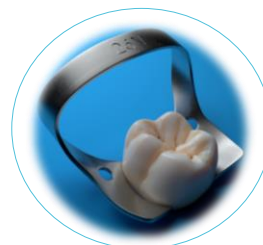

- 08:45 Welcome to the GC Europe Campus
- 09:00 **Presentation**  
Finalization after milling
- Polishing - Easy, fast and beautiful
  - Painting Solutions - state-of-the art aesthetics in a few brush strokes
- 09:30 **Demo & hands-on**  
Simple and efficient polishing protocol of a Lithium Disilicate CAD/CAM Block
- 10:15 Coffee break
- 10:45 **Demo & hands-on**  
Painting and characterization
- Lithium Disilicate: Initial LiSi Block with Lustre Paste ONE
- 13:00 Lunch
- 13:45 **Presentation**  
Luting solutions and tips an tricks for an efficient rubber dam isolation
- 14:45 **Demo & hands-on**  
Fast and efficient rubber dam placement and step-by-step guidelines for adhesive luting
- 17:00 End of the course & certificates

Polishing

Painting

Isolation

Luting

**Dr Adriano Teixeira**

**&**

**Dr. Simone Moretto**

#### *About Dr Adriano Teixeira*

*Dr Adriano graduated in Dentistry from the UNESP State University (Brazil). He also obtained the titles of Specialist and Master in Restorative Dentistry from the University of Sao Paulo (USP).*

*With more than 18 years of clinical experience in his practice, he has already given many hands-on courses to students and dentists which enhanced his skills not only as a trainer but also on developing intuitive educational material to improve the learning process.*

*As a researcher, Adriano has already published papers in reviewed journals and has given presentations in national and international congresses.*

*Now, Adriano is part of the GC Europe N.V. team as a Technical & Training Manager contributing to Campus training courses with all his expertise and teaching abilities in bringing the newest trends in Dentistry to all attendees from the GC Europe Campus.*

---

#### *About Dr Simone Moretto*

*Dr. Moretto graduated in Dentistry from State University of Campinas in Brazil.*

*Afterwards, she obtained the titles of Specialist, Master and PhD in Restorative Dentistry at the Sao Paulo University, Brazil, building part of her education at BIOMAT Research Cluster - Catholic University of Leuven (KUL), Belgium.*

*As a researcher she developed a sound scientific background with papers published in peer reviewed journals and presentations in several International Congresses.*

*With an extensive clinical experience and a solid academic formation, she built up a long-term expertise that supported her in teaching as an Associate Professor at Ibirapuera University in Brazil and afterwards when lecturing in courses of Continuing Education in modern dentistry all around the world.*

*Since 2014 she has joined GC Europe as a Training and Education Manager completing the existing team of experts in developing training courses with a well-balanced clinical and scientific point of view.*
